Subject: mobile PHILIS labs to Hurricane Harvey
Date: Wednesday, August 30, 2017 10:25:48 AM

Eric, I have been given your name as the logistics POC for CMAD's task to deploy the PHILIS mobile labs (2) to the Corpus Christi Command Post area. The PHILIS labs are on the road already, driving from Denver. They are expected in the Corpus Christi area sometime tomorrow. I will have my contractors meet up with the labs and I'll be down either tomorrow evening or Friday morning. I think R6 and HQ's want us to stage the PHILIS units now and then come back later when we get an actual assignment from OPS for running samples. The labs are two 53' trailers which can run off their own generators while on site. They would likely stay put where they are dropped, so need to be certain where we put them to start with. If we could stage them somewhere out of traffic, so we are not in the way, that's secure and that won't cause a nuisance noise wise, since the generators will run all night once we are activated. I'll get you all the contact info for the team arriving tomorrow, ASAP. Please RSVP me to acknowledge this email. Thanks, LPK.
